

Field Trips Ideas

to compliment

Mrs. Green Loves The Earth

1. Visit a recycling center. Many are set up to accommodate groups for a field trip.
2. Find a native garden in your area and arrange to visit it.
3. See if there is a solar farm in your area and maybe they are open to a field trip.
4. If there is an electric car show in your area, a trip there to see the wide variety of electric cars would be interesting.
5. Visit a composting facility.
6. Visit a local farmer's market so your group could purchase locally grown fruits and vegetables.
7. Do a trash pick-up with your group.
